

iMS GmbH – innovative Medizin Systeme

iMS is a young company in the medical technology industry known for its groundbreaking technology in minimally invasive vein treatment. iMS owes its success to its deep-rooted corporate spirit, its innovative strength and its expertise in developing high-quality medical products, which have been on the international market since 2019.

Are you ready to dedicate yourself to a challenging, varied and versatile job in a start-up atmosphere? Are you looking for design and development opportunities in a young, growth-oriented company with flat hierarchies?

Do you have a high degree of initiative and are you used to working independently, initiating projects and taking them forward?

Then you have come to the right place!

To expand our dynamically developing, interdisciplinary technology team at our location in Tutzing near Munich, we are looking for a committed

Development / R&D Engineer (m/f/d)

YOUR MAIN TASKS ARE:

- New and further development of systems and their components in cooperation with external partners and suppliers
- Introducing innovative technology trends into our product developments
- Support of internal quality management according to MDD/MDR (medical devices)
- Open-minded and friendly communication within the interdisciplinary iMS team

YOUR QUALIFICATIONS:

- Degree in electrical engineering, mechatronics or mechanical engineering, medical technology, physics or similar.
- Ideally knowledge of MDD/MDR or DIN/EN/ISO 13485, 14971, 60601 standards.
- Ability to work in a team as well as independently, goal- and deadline-oriented
- Very good written and spoken German and English
- Profound expertise in the use of MS-Office, preferably CAD knowledge

WE OFFER:

- A challenging and varied job with our top product simLa6®.
- Flexible working time models - including home office - and mobile working options
- Above-average basic salary, 30 days' holiday, performance-related remuneration and bonuses, as well as tax-free benefits, pleasant working atmosphere, modern equipment and facilities and free drinks

Have we grabbed your interest? We look forward to receiving your meaningful application, stating your salary expectations and the possible starting date to:
